

The Aereco products are manufactured according to most demanding quality standards. Each stage of the manufacturing process, validated by a quality control, guarantees the reliability and the performance of the products. If despite all these controls, the product working proved defective during the period of guarantee, the Aereco company will free repair or replace the product or its defective parts, according to conditions defined below. Aereco reserves the right only with its own assessment, to proceed any replacement.

Period of guarantee:

The hygroscopic characteristics (1) of the humidity controlled sensor are guaranteed for life. The other constitutive components of the humidity sensitive products such as plastic parts, engine, mechanism, etc, as well as the products not containing a humidity sensor are guaranteed 2 years.

These guarantees are applied starting from the date indicated on the delivery order of product.

Conditions of guarantee:

- This guarantee applies only if the product is accompanied by the invoice or the original receipt (on which the date of the purchase, the type of the product and the name of the retailer are indicated).
- This guarantee does not refund nor does not cover deteriorations resulting from the disassembling of product (2), storage, an installation or a maintenance not conform with the instructions provided by the manufacturer, and inappropriate use of the product.
- This guarantee does not apply if the serial number placed on the product was modified, erased or made illegible. The defective product must then be sent back to the retailer or the distributor, with the address mentioned on the right.

The dismantling, the sending and the reassembling of the product are chargeable to the customer but its return cost to the manufacturer. If the sent back product does not enter under the conditions of guarantee expressed above, the labour cost (3) required by the control and the carriage are chargeable to the customer.

Distributor :

Marc Jardinier,
Chairman.

Collégien, May 10th 2005

(1) They are characterized by a lengthening of the sensor strip tensile stressed by a defined weight according to the relative humidity, in a tolerance range defined by Aereco.
(2) Except so required by the implementation of the product.
(3) The labour costs of control are available at Aereco on request.
